ABOUT MYSELF

I am a Ruby on Rails Engineer with a Computer Science background and a passion for sports. I'm currently pursuing my master's in Entrepreneurship and Business Administration. With almost 3 years of experience in web development, I have a strong sense of responsibility, adaptability, and dedication to meeting deadlines.

TECHNICAL AND SOFT SKILLS

Technical : Ruby on Rails, PostgreSQL, Heroku, AWS, Sidekiq, MiniTest, JavaScript, TypeScript, CSS, Data Structures, Third Party Integrations, Git, DataDog, Metabase, Kibana, OOP, CI/CD
Soft : Communication, Self-Discipline, Problem-Solving, Teamwork, Critical Thinking, Time Management

EXPERIENCE

Ruby on Rails Engineer | *Globant*   *May 2024 – Present*
 – **Project: Data Integration for Practitioners in a Major European Healthcare Platform**
   * As part of the Data Integration team, I contributed to a major project supporting over 90 million users, helping practitioners adopt healthcare products by safely retrieving their data through ETL (Extract, Transform, Load) processes for both imports (joining) and exports (leaving).
   * Worked on 2 applications within the same project: a large Ruby monolith with multiple teams and an Electron app designed to integrate various Practice Management Systems (PMSs) for import purposes.
   * Played a key role in solving bugs, implementing new features, writing tests, and creating technical scopings, while also taking on Electron and TypeScript tasks, demonstrating adaptability beyond my primary expertise.

 In this role, I collaborated closely with a team of 8 people, ensuring the reliability and efficiency of data integration processes and improving overall system functionality.

Ruby on Rails Engineer | *Take Off Labs*   *May 2022 – May 2024*
 – **Project 1: Lead Generation Platform**
   * Implemented Facebook, TikTok, and Snapchat APIs for ad creation, tracking conversions, and monitoring costs, contributing to a comprehensive lead generation platform.
   * Developed a robust Log System and Stats System to track and analyze ad performance data.
   * Designed a mechanism for administrators to request videos from creators, streamlining the creative process.
   * Maintained daily communication with clients to quickly adapt to the fast-paced environment.
 – **Project 2: Medication Sales Website Transformation**
   * Updated a problematic Ruby on Rails website, resolving frequent downtime issues and performance bottlenecks.
   * Achieved nearly 100% uptime and significantly improved response times, enhancing user experience.
   * Introduced subscription services and integrated Apple Pay and Google Pay through Stripe, enabling convenient payment options for customers.
   * Integrated various third-party APIs and CRM platforms to streamline operations.

 In this role, I contributed to enhancing the performance and functionality of various projects, ensuring they met high-quality standards and provided exceptional user experiences. I also played an important role in optimizing database performance by implementing appropriate indexes and models, which significantly improved the overall responsiveness of the applications. These accomplishments are just a few examples of the tasks and projects I successfully implemented during my time at Take Off Labs.

Professional Basketball Player | *CSM Medias/National Team of Romania*   *Sep. 2017 – Sep. 2019*
 – Developed strong **teamwork**, **discipline**, and **communication** skills while competing at a professional level.
 – Learned effective **time management** and **decision-making** under pressure, transferable to professional environments.

EDUCATION

Babes-Bolyai University	**Master's Degree in Entrepreneurship and Business Administration** |	*Oct. 2023 – Present*
Babes-Bolyai University	**Bachelor's Degree in Computer Science** |	*Sep. 2020 – July 2023*

PROJECTS

My bachelor thesis and additional personal projects are available on my GitHub profile, showcasing a diverse range of skills and interests.
